

Truly Random Drug Testing

Random & Automatic Selection of Clients for Drug Testing

Laboratory Services

SAMHSA Certified Lab Testing , Equipment and Devices

Ohio Substance Abuse Monitoring Network Member

Statistical Data & Comprehensive Reports Available

Free, No Obligation 90-Day Trial Program

i-Samson.net

Substance Abuse Monitoring Services Online Network

Put the Element of SURPRISE Back in Random Drug Testing!

American Court Services' proprietary web application, the Substance Abuse Monitoring Services Online Network, or *i-samson.net*, was introduced to criminal justice and treatment communities in 2006 and manages the selection of clients required to submit to random drug and alcohol testing. *i-samson.net* automatically selects and notifies clients for drug and alcohol testing, and provides test results and compliance reports via email to supervising officers, caseworkers and clinicians.

YOU DECIDE

An *evidence-based design* allows you to set the frequency of testing for each of your clients based on risk level, court order, assessment, proximal / distal behaviors or other collaborative information.

FORGET COLOR CODES

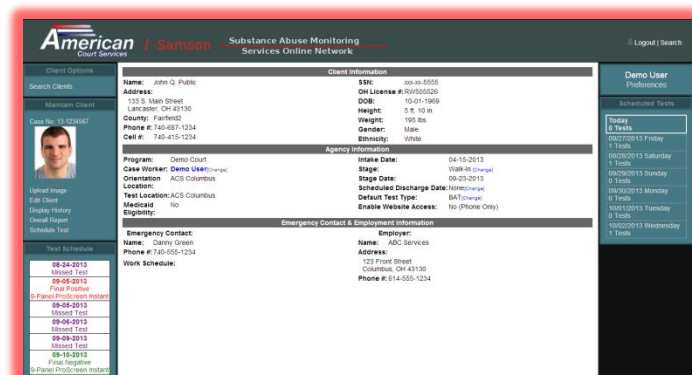

Each client is selected on an individual and truly random basis, so they never know from one day to the next whether or not they will be selected.

COMPLETELY AUTOMATED RANDOM TEST SELECTION VIA TELEPHONE

An *incorporated, toll-free automated telephone system* informs each client whether or not they have been selected for random testing. Tests are automatically generated so caseworkers do not have to worry about creating daily testing schedules.

HAVE MULTIPLE TESTS? SET MULTIPLE SELECTION FREQUENCIES!

i-Samson.net allows you to *set selection frequencies for multiple test types* so clients don't know if they will be tested via their routine screening device or with other devices that test K2, Bath Salts, Alcohol etc. Multiple test frequencies can add to the random nature of your department's drug testing program.

THROUGH THIS DESIGN, I-SAMSON.NET MEETS THE CORE COMPONENTS FOR DRUG TESTING AS RECOMMENDED BY THE NATIONAL ASSOCIATION OF DRUG COURT PROFESSIONALS (NADCP)

CREATE A COLLABORATIVE DRUG TESTING PROGRAM WITH YOUR ASSOCIATES

The HIPAA-compliant Message Center allows authorized agencies to view test results and share critical information across a secure web portal. ***i-samson.net*** provides customizable reports to inform program staff and supervising officers about missed calls, missed tests and positive results.

VIEW YOUR CLIENT'S TESTING HISTORY WITH JUST A COUPLE CLICKS OF A MOUSE

The *Overall Report* allows authorized agencies to compress reports into a specific date range, or show only certain types of information. Test results that are listed in the Overall Report are hyperlinked to direct users to detailed test result information. Overall reports are printable for use in client meetings or court proceedings.

Public, John Q. SSN: 555-55-5555
Case Officer: William Parker

Test Activity:

03-05-2012 **Final Positive** 10 SCRIN/CONF ([Y90983899](#))
 Tested positive for **Marijuana/Cannabinoids**

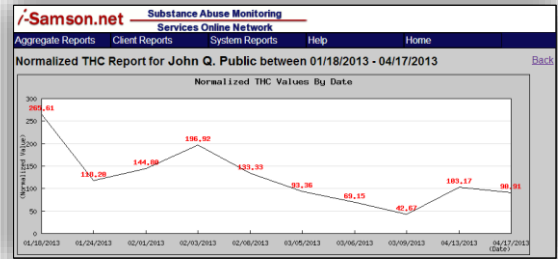

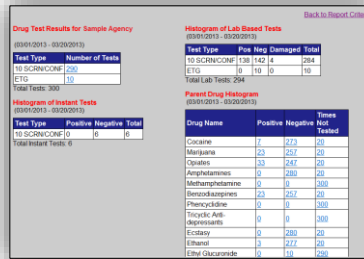

03-12-2012 **Final Positive** 10 SCRIN/CONF ([Y23409876](#))
 Tested positive for **Marijuana/Cannabinoids**

Call Activity:

03-02-2012 Called at 07:34:45
 03-03-2012 Called at 07:03:04
 03-04-2012 Called at 07:34:12

 03-06-2012 Called at 08:34:12
 03-07-2012 Called at 09:23:34
 03-08-2012 Called at 07:23:23
 03-09-2012 Called at 08:34:34
 03-10-2012 **Missed**
 Note: Subject called at 08:34:56, which is outside the assigned call window.
 03-11-2012 Called at 07:14:22
 03-12-2012 **Missed**
 03-13-2012 Called at 00:23:53
 03-14-2012 Called at 07:34:56
 03-15-2012 **Missed**

UTILIZE AUTOMATED STATISTICS FOR FISCAL REPORTS OR GRANT OPPORTUNITIES

The *Info Center* allows program staff to create caseload-specific or agency-wide aggregate statistical data to track test results and trends that reflect the most commonly abused drugs or to analyze the effectiveness of their random testing program.

EASILY IMPLEMENT I-SAMSON.NET INTO NEW PROGRAMS OR FULLY OPERATIONAL PROGRAMS

The application is completely web-based with 256-bit encryption and HIPAA-compliant security features. All information, test results and data is transmitted in a secure, electronic format. The paperless, web-based environment allows *i-samson.net* to be immediately incorporated into both new and existing programs and does not require a single change in the way that drug tests are administered within a department.
