

**83% OF INTOXALOCK CUSTOMERS
WOULD RECOMMEND INTOXALOCK
TO THEIR FRIENDS OR FAMILY.***

*Based on 2013 customer satisfaction survey.

What a customer can expect

- A patient and friendly customer service agent
- Specialists in state regulations
- Affordable pricing
- 1,300 locations nationwide; Over 30 in Ohio
- 24/7 customer support

“ Intoxalock went above and beyond, including working overtime, to help me get this device installed in time. The device is working great, exactly as you said it would. And, while I hope to never, ever, need your services again, I felt it appropriate to let you know that you have a fantastic team. ”

– MIKE, Intoxalock Customer

Intoxalock Ignition Interlocks & Alcohol Monitoring Solutions

About American Court Services

As a well-established provider of court support services, American Court Services brings more than 75 years of experience to the criminal justice and drug and alcohol treatment services communities. We've assembled a staff from law enforcement, corrections and treatment disciplines to provide a unique blend of experience to support court mandated drug and alcohol testing and electronic monitoring.

Our mission is to support probation and parole programs, community corrections agencies and drug and alcohol addiction services with cutting edge technology, expert knowledge and unparalleled customer service. American Court Services has teamed with Intoxalock, a leading ignition interlock provider, to provide affordable, reliable and advanced alcohol monitoring solutions.

About Intoxalock

Intoxalock has been manufacturing ignition interlocks for over 20 years. We were the first company to use fuel cell technology and we are an industry leader in reliability, customer service and technology.

- Over 60,000 customers served annually
- 1,300 service centers nationwide
- 20 years of industry leadership

What is an Intoxalock ignition interlock?

An ignition interlock device integrates breath alcohol testing with a vehicle's ignition system. Prior to starting the vehicle, the driver must submit a breath sample to test for the presence of alcohol. If the driver's Breath Alcohol Concentration (BrAC) is below Ohio's set ignition interlock limit (0.025), the vehicle will start. If alcohol is detected, the vehicle will not start until a passing sample has been provided.

Intoxalock alcohol monitoring solutions

Intoxalock[®] Legacy™

Intoxalock Legacy utilizes fuel cell testing technology to ensure the highest levels of accuracy and dependability. The most customer friendly product and service available to help ensure compliance with ignition interlock regulations.

Intoxalock[®] e»LERT™

Intoxalock eLERT incorporates fuel cell testing technology with color photo verification, GPS and real-time reporting to meet the most rigorous local, state and court ordered ignition interlock regulations.

Intoxalock[®] Home e»LERT™

Intoxalock Home eLERT incorporates real-time reporting, color photo verification, GPS and flexible programming into a portable alcohol monitoring device. A great solution for anyone required to demonstrate sobriety in conjunction with or in place of an ignition interlock.

Intoxalock[®] e»LERT 24™

Intoxalock eLERT 24 combines ignition interlock functionality with the flexibility of 24 hour alcohol monitoring. An affordable alternative to multiple alcohol monitoring devices or programs.
